### Detailed Action

The 35 USC 102(e) rejection of claims 1-2, 6-7, 13-18, 27-28, 30, 48-49 and 53-58 over Cezayirli et al. is withdrawn in view of applicants' arguments.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 18 and 41 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 19 and 39 of copending Application No. 09/875,264. Although the conflicting claims are not identical, they are not patentably distinct from each other because each recites a method for producing a cytotoxic T lymphocyte (CTL) that is cytotoxic for a cell which presents an antigen from a pathogen or tumor wherein said method comprises contacting T lymphocytes with an RNA loaded APC produced by introducing into said APC, *in vitro*, RNA from a tumor cell or pathogen and maintaining the T lymphocytes under conditions conducive to CTL proliferation. The claims of the '264 application would anticipate the instant claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13 (and dependent claims 14-15, 17-18 and 44-47, 54-58) are vague in that there is no antecedent basis for the term "The isolated RNA-loaded APC" in claim 1.

Claims 1-12, 16, 25-27, 29-40, 48-53 and 59 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Guzo, Ph.D., whose telephone number is (571) 272-0767.
